

RAHUL KALYANKAR

Quality Engineering Analyst | Infosys Limited Pune

Pune, India | +91 8806345324 | kalyankarr15@gmail.com | [linkedin.com/in/rahulkalyankar](https://www.linkedin.com/in/rahulkalyankar)

PROFESSIONAL SUMMARY

Quality Engineering Analyst with 4.3 years of experience designing and executing comprehensive test strategies across Insurance, Telecom, and enterprise applications. Expert in Selenium and Playwright automation frameworks with proven success reducing test execution time by 70% through automation and AI-driven approaches. Strong technical foundation in Java, API testing, and CI/CD-integrated test infrastructure, with hands-on experience applying Agile/Scrum methodologies to deliver high-quality releases.

TECHNICAL SKILLS

Test Automation: Selenium WebDriver, TestNG, Cucumber (BDD)

API Testing: Postman, Rest Assured

Testing Types: Functional Testing, System Testing, Regression Testing, Black Box Testing, Integration Testing, End-to-End, Performance Testing

Programming Languages: Java

Test Management & Tools: JIRA, Confluence, Git, GitHub, CI/CD

Development Tools: Eclipse, IntelliJ IDEA, VS Code, Maven

Database: SQL

Methodologies: Agile/Scrum, SDLC, STLC

AI & Automation Tools: GitHub Copilot, AI-assisted test case generation, intelligent test automation,

PROFESSIONAL EXPERIENCE

Project 1 — Workday Automation

Feb 2022 – Mar 2024

Domain: Telecom | Client: Telstra

- Automated end-to-end business workflows in the **Workday application**.
- Created and validated **customer/employee records** based on business requirements.
- Tested **payment-related processes** and verified transaction details.
- Validated the integration of employee/customer data from **Workday to UKG**.
- Tested employee compensation-related scenarios, including **adding and updating employee bonuses**.
- Performed **functional, regression, integration, and end-to-end testing**.
- Created and executed test scenarios and test cases for new requirements.
- Validated data between source and target applications after integration.
- Reported and tracked defects using the project defect management tool.
- Worked closely with **Business Analysts, Developers, and other stakeholders** to clarify requirements and resolve issues.
- Participated in Agile/Scrum activities such as **daily stand-ups, sprint planning, and retrospectives**.
- Maintained automation scripts and executed regression suites for new releases.

Project 2 — Usage Mediation and Premium Services

April 2024 – May 2026

Domain: Telecom | Client: Telenet (Belgium)

- Analyzed business and functional requirements for **telecom mediation applications**.
- Developed and tested mediation **configurations and scripts** to support new network changes.
- Validated the transformation** and encryption of CDRs before they were sent **to rating systems**.

- Performed functional, regression, and end-to-end testing of mediation workflows.
- Identified, **logged, tracked, and verified defects** using defect management tools.
- Investigated production issues caused by unexpected network changes and worked with the team to deliver quick fixes.
- Verified successful **recovery and processing of CDRs across all output streams after issue resolution**.
- Collaborated with developers, business analysts, and stakeholders in an **Agile Scrum environment to ensure quality software delivery**.
- Prepared test cases, executed test scenarios, and documented test results.

EDUCATION

Bachelor of Engineering in Mechanical Engineering

Matoshri Engineering College, Nanded | 2020

CERTIFICATIONS

- Infosys Certified Manual Testing Professional
- Infosys Certified Advanced AI Professional

ACHIEVEMENTS & AWARDS

- 1st Prize – AI Hackathon, Infosys (2026): Innovative AI-driven solution for test automation and quality engineering.
- 3rd Prize – AI Think Storm, Infosys (2026): Innovative AI concept for intelligent quality assurance.
